

ECHELON INSTITUTE OF TECHNOLOGY, FARIDABAD

REPORT ON STUDENTS' CANTEEN, MESS AND DRINKING WATER ARRANGEMENTS

Photographic Documentation | Inspection dated 15 October 2026

1. Objective

This report documents the student food-service areas and drinking-water-related facilities at Echelon Institute of Technology, Kabulpur Patti Mahtab, Haryana.

2. Facilities Observed

- **Students' mess / dining area:** A large dining space is available with stainless-steel tables and fixed stools. The area has windows for natural light and ventilation, ceiling fans and washable flooring.
- **Canteen / café service:** A designated café/food-service area is visible with a counter, menu displays, seating signage.
- **Food and beverage vending:** Vending machines for packaged snacks and beverages are placed at various locations. These provide an additional point of access to refreshments.
- **Handwashing / wash-up facility:** A multi-tap wash-up trough and a stainless-steel sink/wash station are available. These facilities can support handwashing and cleaning; their working condition and hygiene status are checked during routine inspections.
- **Drinking-water arrangement:** A RO treated water is made available for drinking purposes

3. Conclusion

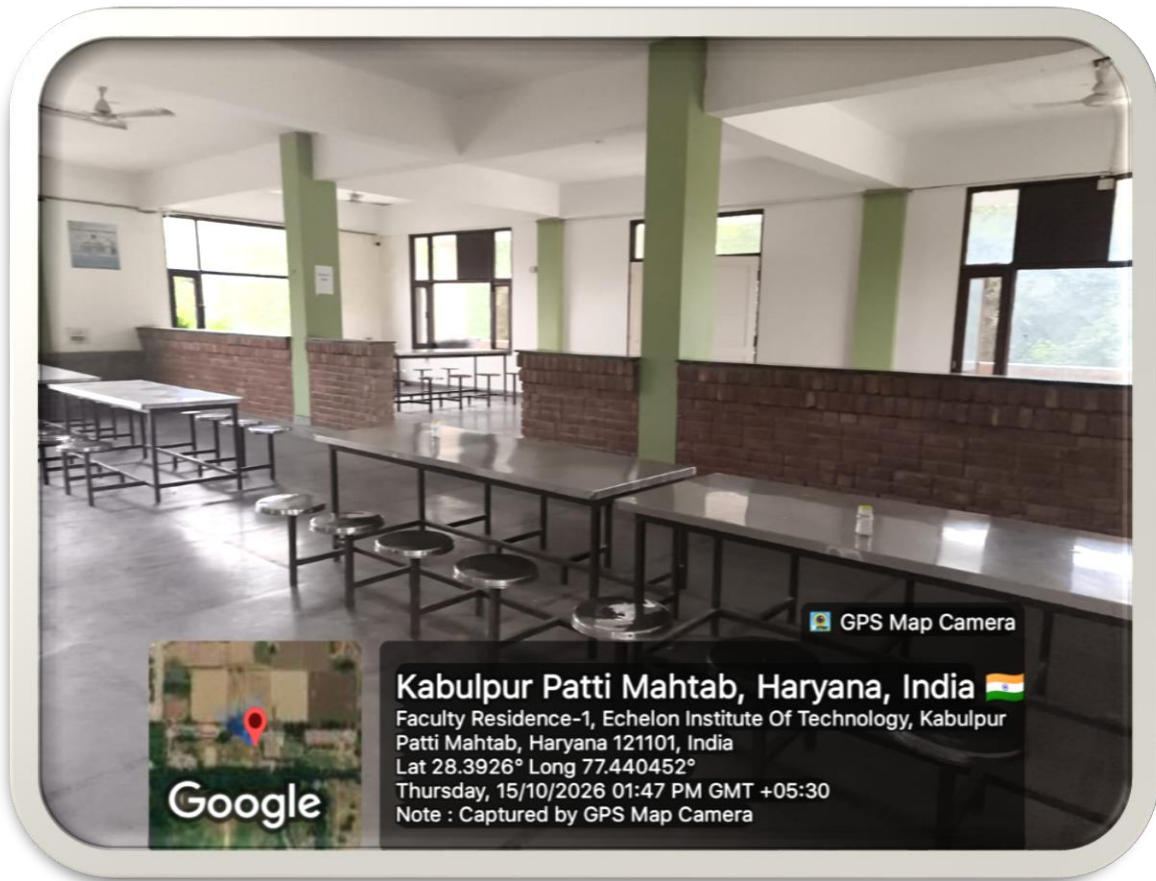

The photographs indicate that the Institute has a designated students' mess/dining area, a café/food-service counter, vending facilities, wash-up fixtures and a drinking-water unit. These facilities support student access to meals and refreshments on campus. To complete the quality-assurance record, the Institute should maintain verifiable evidence of routine cleaning, food-safety practices, drinking-water testing, equipment servicing and periodic facility inspections. No claim regarding microbiological water safety or full regulatory compliance can be established from photographs alone.

4. Photographic Evidence

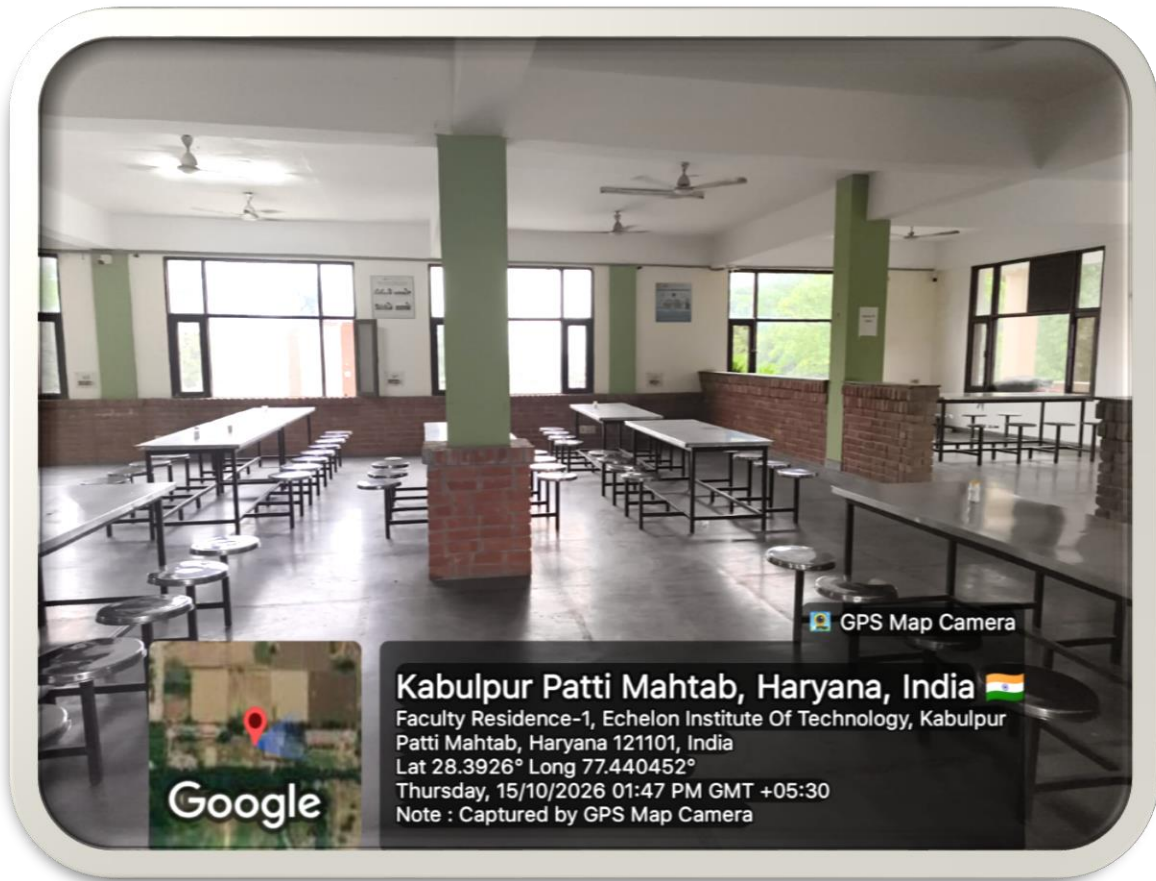

Selected photographs are included below as visual evidence. GPS-camera overlays show the campus area and capture date/time; captions describe only what is visible.
