PRASHASTI 2022

On 06th August 2022, Echelon Institute of Technology organised Prashasti 2022. It was organised besides Techelon 2022. The: Parents Institute Conclave was also held on 06 August 2022, thereby giving the parents a reason to visit the campus. Prashasti 2022 was organised to appreciate and award the students who have achieved excellence in academics, club activities and sports. Students were awarded in various categories like perfect attendance, academic excellence, extra-mile award, club award, semper fi award, Techelon awards for seniors and the Principal's Award to a student who has scored the highest % of marks throughout all the semesters.

Inter College Chess Competition

After several rounds of intense gameplay, the winners were finally announced. The bronze medal was won by the talented duo of Pratham and Prashun, who displayed exceptional chess skills and strategic thinking throughout the competition.

Accolades!!!

July 2022

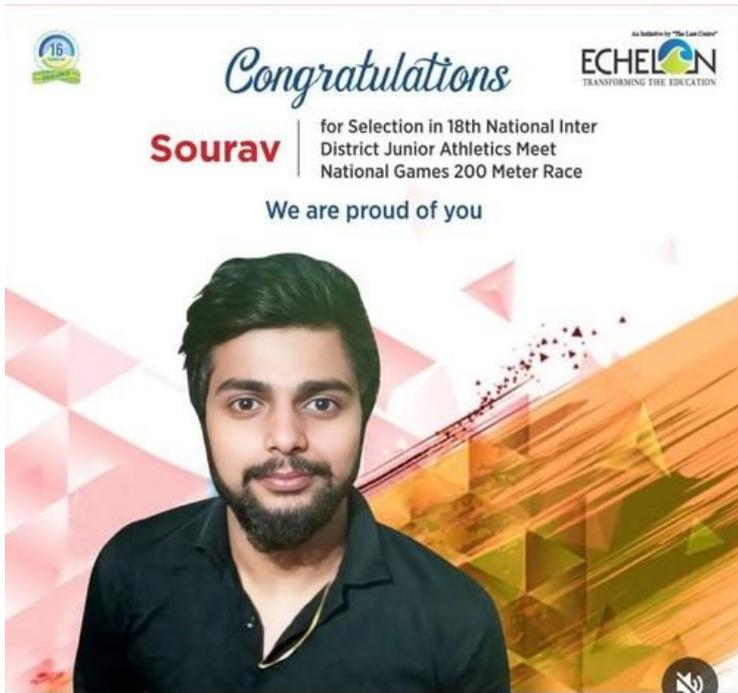

Congratulations Pratham and Prashun for winning the Bronze Medal in Inter College Chess Competition held at JC Bose University of Science & Technology. We appreciate your efforts. The competition was coordinated by Nasima Ma'am, who did an excellent job of ensuring that everything ran smoothly throughout the event.

Sprint Running National Level Trials

"Congratulations to Sourav Attri and Nishant Attri on their remarkable achievement of being selected for the 18th National Inter-District Junior Athletics Meet in the 200-meter race. Your hard work and dedication have paid off, and we are proud to see you represent our district at the national level. Well done!

Teacher's Day Celebration

"Those who educate children well are more to be honoured than they who produce them; for these only gave them life, those the art of living well." - Aristotle.

Blood Donation Camp on Teacher's day.

Teacher's Day Celebration

Pandemics eventually end. Three years after COVID burst onto the scene, the world appears to have turned the corner on the first global pandemic in a century. In September, the head of the World Health Organization declared that the end of the pandemic is “in sight.” That reality was evident in the fact that many countries abandoned the lockdowns, travel restrictions, and related measures that they had imposed when COVID swept across the world in early 2020. They were able to do so because of the success of vaccines and therapeutic treatments in lowering the chances of dying from COVID and because many of their citizens had already been infected and developed some protection against the virus.

The one exception to this trend was China. It pursued a zero-tolerance policy long after every other country had abandoned the strategy, preferring instead to impose draconian crackdowns whenever and wherever outbreaks occurred.

By late 2022, the Chinese people had begun to rebel against what Chinese officials had hailed as their great success. In December, Beijing began easing its COVID restrictions. However, it had not developed its own highly effective vaccine, refused to import highly effective Western vaccines, and had a population with relatively little exposure to COVID. So, the death toll in China from COVID will soar in 2023. Even if China avoids the death tolls that the United States and other countries experienced in 2020, COVID will remain a deadly disease there and elsewhere for years. At the end of 2022, more than 2,000 Americans were dying of COVID each week.

“And once the storm is over, you won’t remember how you made it through, how you managed to survive. You won’t even be sure, whether the storm is really over. But one thing is certain. When you come out of the storm, you won’t be the same person who walked in. That’s what this storm’s all about.”

— Haruki Murakami, *Kafka on the Shore*
